PREFACE.

IN the present volume all the cuneiform tablets in the British Museum having Aramaic inscriptions, are brought together for the first time, and arranged for purposes of comparative study.

The cuneiform texts with their Aramaic readings, as they appear on the tablet, are reproduced with as much fidelity as possible; and the individual Aramaic texts appear separately in a body of notes, where each is discussed. The reader is requested to compare the legends in both places, as it may sometimes happen in the process of etching, that the original is more faithfully produced in one place than in the other. The entire corpus of Aramaic inscriptions will be found grouped together at the close of the cuneiform texts, where readings may be compared, the development of the alphabet traced, and the individual peculiarities of the scribes noted.

In the transliteration and translation the cuneiform order is followed, so that the line for line of the Assyrian may be preserved. This has obvious disadvantages, but I think the advantages outweigh them.

I have not thought it necessary to mark all accented letters, as *ú*, *šá*, etc., nor have I usually indicated long vowels when they were not indicated by the

scribe. In the translation I have generally shown the constituent elements of proper names where these were certain.

I desire to acknowledge the uniform courtesy which I received while copying these tablets in the British Museum, from Dr. E. A. Wallace Budge, keeper of Assyrian and Egyptian antiquities, as well as from his assistants. Every facility and encouragement was given me toward making the collection complete.

I am indebted to my instructor, Prof. Robert Francis Harper, for valuable suggestions and help while studying these texts. Rev. C. H. W. Johns, M.A., lecturer in Assyriology in Queen's College, Cambridge, has also laid me under obligation by reading the greater part of this book in the proof sheets. While this kindness on the part of Dr. Harper and Mr. Johns is highly appreciated, yet neither of them is to be held responsible for opinions expressed here.

Parts I., II., and IV. of this book were originally presented to the University of Chicago for the degree of doctor of philosophy.

INTRODUCTION.

THE tablets which are here autographed are selected from the different collections of the British Museum because they constitute a group in which appear the so-called "Aramaic dockets." These have been a subject of especial interest since the early days of Assyriology, when they were first noticed and discussed by Sir H. C. Rawlinson in 1864.

The work of collecting, collating, and editing the series was undertaken in 1896, at the suggestion of Dr. E. A. Wallace Budge, keeper of Assyrian and Egyptian antiquities in the British Museum, and under the direction of my respected teacher, Prof. R. F. Harper, of Chicago University.

At that time about half of the tablets had been published by Sir H. C. Rawlinson in *W. A. I.*, Vol. III., and by M. DeVogüé in "*Corpus Inscriptionum Semiticarum*," *Pars Secunda, Tomus I.*

Since my copies were made the Rev. C. H. W. Johns, M.A., of Cambridge, England, has published a valuable collection of "contracts," etc., in which also a number of these Assyrian texts appear, though without the Aramaic readings.

At the time when these tablets were copied by me, fourteen of them had not yet been published, and four only in part. At present, ten, I believe, appear for the first time.

The work was undertaken in order to bring together in one collection, for comparison and study, all

“contracts” having Aramaic readings, and I think in this respect the collection is complete. It is, so far as I know, the first and only attempt in this direction, and I hope that thereby material is furnished which will throw light on the language of the so-called “dockets.” I use the term, “Aramaic Reference Notes,” which I think more nearly describes the contents of these fragmentary inscriptions.

As for the general character of the work done on these inscriptions by the “Corpus Inscriptionum Semiticarum,” no testimony is here necessary; but one or two trifling defects may be noted. The work is not complete, and hence much material that might have been useful in drawing general conclusions is wanting. In the second place, the Aramaic part of the work seems to have received much more attention than the cuneiform, and consequently the latter has suffered. The text and translation do not always come from the same source, and sometimes it seems that they have not been carefully compared. The text and transliteration of K.320, for example, are given on page fourteen, the transliteration of the first line reading: *Kunuk Mutak-kil an-su*. On the opposite page is the translation given by Oppert: “Sigillum Mutakkil-Marduk.”

On page seventeen the text of K.76 is given, and in line six a mistake of Rawlinson’s, in W. A. I., III., is reproduced; that is, the two signs for the second word, *bintu*, change places. The same want of comparison between transliteration and translation appears in this case also. In K.320, p. 13 f, we have the word *amtu* read *sal-lat*, but read again correctly in K.281, p. 20. These errors are trifling in them-

selves, but indicate a grave defect in the plan and oversight of this part of the work. No serious effort was made to reproduce the Aramaic script, which varies so considerably with the date of the tablet, and hence makes an important contribution not only to the study of palæography, but likewise to text interpretation.

The first important attempt to interpret "contracts" was made by Oppert and Menant, in a work called "Documents Juridiques de l'Assyrie et de la Chaldée," published in 1877. This work, considering the material then available, is accurate in a remarkable degree, and has formed the starting point for all subsequent studies of this class of tablets. Many readings which have since been made out by the syllabaries, etc., are, of course, undetermined—such as, for example, *ka-ka* for *dabābu*, and *igguguni* for *igarruni*, (or *iparihuni*, as Peiser prefers to read it.) A commendable attempt is also made to reproduce the Aramaic script just as it appears on the tablet. As indicated above, this furnishes some evidence of the date of the tablet, and at the same time provides data for the independent investigation of the readings. The texts used are, without important exceptions, those of Rawlinson's. Oppert has continued to do splendid work in this field down to the present, and many valuable contributions from his pen have appeared in "Zeitschrift für Assyriologie," as well as in other publications. I shall have occasion to notice later his interpretation of the very obscure text, 76-10-16, 17.

Rawlinson's texts of the "contracts" appeared in W. A. I., Vol. III., in 1870. These texts exhibit a

remarkable degree of accuracy. Assyriology has made wonderful strides since Rawlinson's time, and most of his texts have been copied and collated again and again, but only to bear witness to his genius. Very few corrections have been made, and these only where familiarity with formulæ has suggested the reading of broken or rubbed signs.

Rawlinson's treatment of a number of the Aramaic readings discussed in this book is worthy of more than a passing mention. His work which was published in the *Journal of the Royal Asiatic Society* in 1864, Vol. I., Part I., N. S., has since formed the basis of all treatment of these legends. The contribution there made to knowledge is remarkable for its insight, and subsequent study has, in a large measure, vindicated Rawlinson's conclusion.

At the time this work was done the claims of Assyriologists were met with skepticism in many quarters, and it was hoped at one time that corroborative evidence for cuneiform readings might be found in the Aramaic. After some study, Rawlinson confesses his doubts in words that are well-nigh prophetic. He says: "In reality, the so-called Phœnician key has added but very little to our knowledge of either the Assyrian alphabet or language, and I cannot therefore regard it as of any essential value." How true these words are is witnessed by the fact that, instead of the Aramaic proving a help to us, the reverse is the case, and we are obliged not infrequently to turn to the cuneiform for an interpretation of the Aramaic.

Rawlinson explained the word דַּנַּת, *danat*, which he derived from the Assyrian word, *nadānu*, as a noun, meaning "gift," or "sale."

DeVogüé says it is an Assyrian word from the stem ננן, which has the same meaning as נתן in Hebrew or Aramaic. This word is now known to mean "document," or "tablet," and to correspond to the Assyrian *dannitu*.

Cook, in the body of his "Aramaic Glossary," gives the definition, "a selling," or "document;" but in his "corrections" he gives only the definition, "contract," "record of sale," and seems to follow Winckler's explanation which connects it with the Nabataean word, תנא, "agreement," "contract."

Rawlinson finds some difficulty with the word *amtu*. He reads the cuneiform as two signs, *šal-lat*, but notes that the suffix attached is *su*, not *šu*. This leads him to the accurate suggestion that this word does not end in *t*, but is a "Tauranian compound." Subsequent study has proved the correctness of this conclusion. It is worthy of note here that C. I. S., which acknowledges its indebtedness to Rawlinson's study of these readings, transliterates this sign in the same place, *šal-lat-šu*, though it reproduces it correctly, *amti-šu*, elsewhere.

The next work of importance dealing with "contracts," a work already referred to, is "Corpus Inscriptionum Semiticarum," *Pars Secunda, Tomus I*. This work was undertaken principally on account of the Aramaic, yet since the cuneiform also found a place it is a pity that this part of the work was not done more carefully.

The following "contracts" are discussed, though either text or translation, and sometimes both, are wanting: K.3788, K.5424, 83-1-18, 329 (which latter the editor says Mr. Pinches copied for him); 81-2-4,

152, also copied by Pinches; and 81-2-4, 395. The following correction of the numbering may be of service: No. 26, K.5424 should be K.5424c; No. 27, called *θ* 5, an old number, should be K.8528; No. 35, *Musei Britannici* 188, should be Rm. 188 (did the editor confuse the letters Rm. with B.M. ?); No. 37, called *θ* 18, should be K.8529.

Two important works are from the pen of Dr. F. E. Peiser. "Babylonische Verträge," published in 1890, contains the texts of forty-seven tablets from the Berlin Museum, the transliteration and translation of one hundred and twenty-one tablets from the Berlin Museum, thirty-four from the British Museum, and an introduction on judicial matters among the Babylonians, by Prof. J. Kohler, of Berlin.

Volume IV. of the "Keilinschriftliche Bibliothek," edited by Dr. Eberhard Schrader, contains the transliteration and translation, by the same author, of a vast number of tablets dating from the earliest down to the latest times.

To these must be added "Aus dem Babylonischen Rechtsleben," edited by Prof. J. Kohler and Dr. Peiser, containing the translation of a large number of "contracts," with discussion of problems relating thereto. Dr. Peiser's work marks an epoch in the study of "contract" literature, and he is deserving of praise for the scientific manner in which that work is done.

A very important work, and the only one dealing with the old Babylonian "contracts" before the last-mentioned volume by Peiser, is Meissner's "Beiträge zum altbabylonischen Privatrecht," Leipzig, 1893.

Of important text publications we may mention

first, those of Rawlinson and Norris, in W. A. I., Vol. III., published in 1870.

Strassmaier's voluminous work on Babylonian texts furnishes a vast amount of material for the lexicographer. His "Inschriften von Nabonidus," was published in 1889. These texts were the basis of Dr. K. L. Tallqvist's valuable contribution to the grammar and lexicography of the later "contracts," viz., "Die Sprache der Contracte Nabû-Nâ'idis."

Rev. C. H. W. Johns's excellent volume of Assyrian "contracts," etc., containing seven hundred and sixteen texts, was published in 1898. Aside from Strassmaier's texts (which were all Babylonian), this is the largest single collection of "contracts" yet published, and Mr. Johns has well deserved the thanks of all Assyriologists for the rich mass of material therewith supplied. The principal difficulty in the way of interpretation of "contracts" heretofore has been the paucity of texts. Happily, this difficulty is now, in a large measure, removed, and when we hear from Mr. Johns's second volume, no doubt many obscure phrases will be cleared up. His work should be especially valuable for the study of the eponym canon, supplying as it does, quite a number of new archons. It will also serve well in the study of the difficult subject of proper names.

Mr. Johns's plan of avoiding all shading of broken parts and restoring undoubted readings within brackets has much to commend it, and it certainly presents a fairer page; but on the whole, I doubt its expediency. There is always present the danger of missing a bracket; and I believe students will prefer to know

exactly what is on a tablet, even to the extent of a broken wedge.

A very commendable feature of this volume is the arrangement of material according to contents rather than chronology. When the student is endeavoring to solve formulæ or phrases, it is a great advantage to have numerous examples at hand. This arrangement, especially when tablets are dated, has nearly everything in its favor.

“The Babylonian Expedition of the University of Pennsylvania,” Vol. IX., which appeared in 1898, contains, besides an introduction, a valuable list of proper names, transliteration and translation of a few texts, about one hundred and twenty “contract” tablets relating to the business affairs of the Murashû sons, dated in the reigns of Artaxerxes I. and Darius II.

Drs. Hilprecht and Clay have been at great pains to reproduce the individual peculiarities of the texts, and have succeeded well. The composition of the signs showing, as they do, a tendency toward simplification in the late period from which these tablets come, the special characteristics of each scribe’s writing, the crasures, the omissions, even the traces of a poor stylus, are all, in the interest of palæography, indicated or reproduced as nearly as such things can be reproduced by the pen.

Very especial interest attaches itself to the fact that in this volume there are two tablets, Nos. 71 and 66 a, with fairly well-preserved Aramaic inscriptions, while on others there are traces of Aramaic letters written with ink.

The volume in question exhibits everywhere the

care, insight, and scholarship of its authors; and the numerous other volumes yet to come will be welcomed by students. Americans are to be congratulated on having such a valuable cuneiform collection within their reach as that which is now finding a home at the University of Pennsylvania. I am indebted not only to the complete and accurate list of proper names this volume contains, but also to the suggestive discussion of this most difficult subject given in the same place.

Attention is here called to "Beiträge zur Assyriologie," *Dritter Band, Heft 3*, where Messrs. Ludwig, Demuth, and Ernest Ziemer have each furnished a transliteration and translation of fifty "contract" tablets, the former from the time of Cyrus and the latter from Cambyses. The fact that Drs. Demuth and Ziemer were, at the time the work was done, students of Prof. F. Delitzsch, and that the work was done under his supervision is sufficient guarantee of its excellence. The work contains important introductory matter, including a discussion of proper names, by Prof. Delitzsch, and was published in 1897.

My purpose has been to reproduce as accurately as I might the Aramaic on each tablet, and at the same time to make the cuneiform trustworthy. The work was undertaken principally on behalf of the Aramaic, and I regret that it does not better justify its purpose. The Aramaic legends are so fragmentary, and the material for comparison so often wanting at the critical place, that a number of problems are still waiting solution. I thought it best, however, that the results already obtained should be submitted, and the undetermined problems await further leisure and study.

With each reading will be found the various interpretations that have been suggested, and a comparative table of the inscriptions is also added. It was my original intention to arrange these tablets according to contents, but there were so few of each kind that it was thought better to abandon this plan in favor of a chronological arrangement, even though many are without date.

I desire here to call attention to one or two matters of interest noted during the study of the texts. The word *pân*, "in presence of," which appears before the name of each witness, was translated "witness" long ago by Oppert. I have retained the later definition, and have uniformly translated, "before." But I wish to mention here an interesting fact, with some possible bearing on this reading, noted in a hurried examination of Mr. Johns's texts. In No. 385, R. 12, after the names of seven witnesses we read, "Napharu 7 šr (pl.)^{al}," etc.; and in No. 416, R. 6, after the names of six witnesses, "Napharu 6 šr (pl.) ša^{al}," etc.; and in No. 446, R. 14, after the names of five witnesses, "Napharu 5 šr (pl.)^{al}," etc. (Cf. 331, R. 6; 350, R. 11; 391, R. 17; 408, R. 12; 416, R. 6; 448, R. 22; 500, R. 3; 637, R. 2.) How this sign should be read, I am not certain, but it is evidently a noun referring to the witnesses, and seems to mean either "witness" or "person." Peiser, in K. B., reads *pânî*, "zeugen."

In No. 30 (82-9-18, 50 a) occurs the word *abattum*, the second syllable of which was regarded by Tallqvist in Spd. Nbd. as uncertain. Our tablet, where the word appears in both the cuneiform and the Aramaic, puts the reading beyond doubt. Other occurrences of the word are interesting:

Str. II., No. 201: Kaspi i-di bitâti ša ḳabal ali
ša a-na a-bat-tum.

This is followed by a list of debtors, with the amount owed by each.

Str. II., No. 523: 40 gur suluppu ša ^mItti-Marduk-
balâtu
apil-šu ša ^mNabû-ahê-iddin apil ^mE-gi-bi
ina muḥ-ḥi ^mBêl-uball-iṭ apil-šu ša ^mBu-u-
za apil ^mBa-nu-nu
ina ^{arab}Kislimi ina Babili
ina muḥ-ḥi nâru i-nam-din e-lat
u-an-tim maḥ-ri-tum
biti(?) ša a-na a-bat-tum ša immêri
^mBêl-iddin-na

Str. II., 752: $\frac{1}{2}$ mani kaspi a-na bit karê
10 šiklu a-na a-bat-tum
^mNabû-zêr-ukîn u ^mNûr-^{ilu}Šamaš

Str. III., 306: 2 (quoted by Tallqvist): 00 gur abattum.

From these passages it seems that *abattum* was sheep fodder or wool stored in houses in the city.

In K.458 the form *me-me-ni-(šu)* occurs instead of *mamâna* = *mammâna*, "anyone." (Cf. A. D. D. 246, R. 4, *lu-u me-me-ni-šu-nu*; and 418, R. 6, where the form *nu-nu-nu-šu-nu* interchanges as above, with the regular *manma*.)

Another interesting phrase, one of the words of which, so far as I have noticed, is always written ideographically is *i-za-ḳu-pa-ni*, *i-GIL-u-ni*. This last word I read *igarruni*, while Peiser has read it *iparaḳuni*. (See Brünnow, No. 1390 and 1392, where the values *garû* and *parâku* [with *k*], respectively, are

given.) I have noted the forms *i-gar-ru-u-ni* and *i-pa-ri-ku-ni*, but in neither case are they accompanied by the word *izakupanî*. The following examples are taken from A. D. D.:

No. 252: Man-nu ša a-na Ur-kiš a-na ma-te-ma e-la-an-ni
lu-u, etc., . . . itti ^mAsûr-mu-kin u apli-šu
kur-bu i-gar-ru-u-ni, etc.

No. 436: Man-nu ša ina] ma-te-e-ma ina ar-kat
lu-u, etc., . . . ša e-la-an-ni
di-e-nu dabâbu itti ^mApli-a-a
u aplê i-gar-ru-u-ni
i-ḳab-bu-u-ni-ma-a kas-bu ga-mur
la ta-din, etc.

No. 474: Man-nu ša ina ar-kat umê ina ma-te-(ma)
kur-bu] e-la-an-ni lu-u, etc.
ša e-la-an-ni di-e-nu dabâbu
ištu pân ^mApli-a u aplê-šu
i-gar-ru-u-ni i-ḳab-bu-u-ni
ma-a kas-bu la ga-mur la ta-ad-din

No. 552: Di-e-nu] dabâbu la-aš-šu
man]-nu ša ina ur-kiš ina [ma-te-ma]
i-pa-ri-ku-u-ni . . .
. . . manê kaspi.

From these and other passages I conclude that it is not clear whether we should read, *garû*, or *parâku*. Mr. Johns, in A. D. D., III., follows Peiser's reading, and holds that *garû* is a synonym for *ubta'u*.

Another passage of special interest because of its obscurity occurs in 83-1-18, 338, R. 21:

ṣib-tu be-e-nu a-na 100 ûmê
sa-ar-tu a-na kâl šanâti

I have examined over a dozen of these passages and have found the following variations:

- 1: *šibtu ana 100 ûmê*
sartu ana kâl ûmê
- 2: *šibtu bienu ana 100 ûmê*
sartu ana kâl ûmê
3. *šibtu bienu ana 100 ûmê*
sartu ana arkât ûmê.

Peiser translates the phrase in K.B.: "Die Kopfsteuer ist bezahlt für 100 Tage die eintragungspforte für alle jahre." Johns, in P. S. B. A., interprets as follows: "The profit or service for one hundred days shall be the compensation for every year." That is, the slave, instead of a full service, shall compound for the year's work by one hundred days' service. The *sartu* is the fine imposed by the *sartenu*, "judge." In thirteen occurrences of this phrase which I have examined, I have noted that in nine of them male or female slaves are sold, and in four, presumably the contract describes the sale of slaves. In nine cases this phrase occurs after the forfeit passage, as *e. g.*:

. . . 4 manê kas[pi] 2 manê hurâši sakru ina
bur[ki Ninip]
ašib ^{at} Kalhi iššak[an] šibtu, etc.

In two cases it occurs just before this forfeit clause, and in three cases not only after the forfeit clause, but after the statement:

Ina dînišu idabubma lâ ilaḳḳi.

It would seem, therefore, that this is another provi-

sion of the forfeit clause, rather than a regulation concerning taxes, as Dr. Peiser suggests.

A somewhat different passage occurs in W. A. I., III. Pl. 49, No. 3, line 32, which may throw light on the phrase under discussion. It reads:

Ša sinništu ištu pân sartu kâtâ ŝibtu ḥabulli.

A complete summary of the discussion of this much-disputed phrase will be found in A. D. D., III., p. 391 f. Oppert's rendering is given as follows: "Voluntas libera et quies ad centum dies est conditio ad omnes annos;" or, again in "Das Assyrische Landrecht," Z. A. XIII., p. 268: "Willensfreiheit und Ruhe für hundert Tage dieses ist der Obligatio für alle Jahre." Prof. Delitzsch, in H. W. B., p. 108 b, quotes the phrase under *bennu* and says: *ein Fluch*. Prof. Jensen, according to Mr. Johns, suggests "fever" for *ŝibtu* and *bennu*, and "defect" for *sartu*.

None of the proposals satisfies the passage in W. A. I., III., 49: 3. The phrase varies so little and is so isolated, that we may hardly hope for the correct solution till we find other readings.

Still another interesting passage, only a fragment of which remains, appears in 83-1-18, 350, R. 34. This clause runs normally as follows:

2 *imér* sisê ina šêpâ *ilu* Ašûr i-rak-kas
4 *imér* mur(?) -ba-kan-ni ina šêpâ *ilu* Ninip
u-še-rab.

Instead of *u-še-rab*, the verb, *u-sal-li*, sometimes occurs.

In a review of A. D. D. in "Göttingischen gelehrten Anzeigen," No. 3, Berlin, 1899, Prof. H. Zimmern calls attention to this passage in connection

with a similar one found in A. D. D., No. 436, R. 7 f (cf. No. 474, R. 4). This passage reads:

Māru-šu ana ^{ilu} Sin išarrap
 binat-su rabu-te . . . a-na Bêlit šeri i-šar-rap.

Dr. Zimmern translates: "So soll er (zur Strafe dafür) seinen Sohn dem Gotte Sin verbrennen, seine älteste Tochter der Göttin Belit-Şeri (d. i. die Herrin der Wüste) verbrennen." Then Dr. Zimmern adds: "Eigentümlich ist auch der häufig erwähnte Ritus, dass in gleichem Falle dem Sin von Harrân oder dem Gotte Assur 4 bezw. 2 Schimmel gespendet werden sollen." Dr. Zimmern, of course, does not mean that the animals in question shall be burned.

In this phrase the verbs are *u-še-rab* (III. 1, of *erêbu*, "to enter") and *i-rak-kas* (I. 1, of *rakâsu*, "to bind"). The former sometimes changes with *u-šal-li* (II., of *šalu*, "send"). Mr. Johns derives the latter from *šûlû*, "to dedicate." (A. D. D., III., 345.)

The very obscure tablet, No. 29 (76-10-16, 17), deserves special attention here, because of the variety of treatment it has received at the hands of different Assyriologists. The phrase that has occasioned the difficulty is as follows:

ʾBurašu put šêpi ša Ilâni-kanûa aššati-šu
 ina kâtâ ^mPani-Nabû-țêmu našâtu
 ûmu ša ^mPani-Nabû-țêmu
 itebir ^mIlâni-kanûa
 tabakkamma ana Pani-Nabû-țêmu tanamdin.

Instead of *aššati-šu*, C. I. S. has *muti-su*. The chief difficulty, I think, arises out of the use of the preposition in the last line. If this woman is a pledge to Pani-Nabû-țêmu during his absence (see lines 1-3),

she should be given back to Ilâni-ḡanûa on the return of the former; so I construe *tabakka* with "Ilâni-ḡanûa." How, then, could she also be given back to Pani-Nabû-ṡemu? I understand this latter clause to refer to the present transaction, and translate: "To Pani-Nabû-ṡemu she is (now) given (as a pledge)."

In C. I. S. Oppert translates: "Usque ad diem quo Pani-Nabu-temu, frater viri Ile-qanua, messe redierit, in commodum Pani-Nabu-temu, Burasu pro non abitu-
turo marito suo Ile-qanua vadem se dabit. Die quo Pani-Nabu-temu redibit (maritum) Ile-qanua (uxor) derelinquet (fratrique) Pani-Nabu-temu dedit."

Oppert returns to this text with an extended discussion in "Zeitschrift für Assyriologie," *III. Band, 1 und 2 Heft*, April, 1888. *Utu a-lu-la* is transliterated *apak la ibbir*, and translated: "Ne sera pas revenu de sa pérégrination." *Tapakkamma* is taken from the root, פכה (laisser, abandoner). *Muti-su* is also kept and translated, "her husband," but no explanation of the masculine suffix is attempted.

Prof. Sayce has also given us a translation in B. A. L., p. 130, as follows: "As long as Pani-Nebo-dhemi, the brother of Ili-qanua, does not return from his travels, Burasu, the wife of Ili-qanua, shall share in the business of Ili-qanua, in the place of Pani-Nebo-dhemi. When Pani-Nebo-dhemi returns, she shall leave Ili-qanua, and hand over the share to Pani-Nebo-dhemi."

This is given as an example of a wife as agent, "taking the place of her husband or other relation during his absence from home." In this translation *put* must mean, "share in the business," while *ina*

kātā is translated, "instead of." This seems very improbable, to say the least. Why Burašu should "leave" her husband and, just what Prof. Sayce translates, "hand over her share," is not apparent. Neither is it evident from Oppert's study of the text why Burašu leaves her husband on the return of the brother-in-law. If we are to go behind the record and assume some incapacity on the part of Ilāni-kanūa, then we might translate the closing lines: "When Pani-Nabû-ṭēmu returns, she shall return Ilāni-kanūa, to Pani-Nabû-ṭēmu she shall give (him)."

The presence of the Aramaic on these tablets has never been very satisfactorily explained. In his discussion of the inscriptions in *J. R. A. S.*, Rawlinson pointed out that in some cases the Aramaic was part of the original document, while in others it had been scratched on the hard tablet "by the Record-keeper, for the mere convenience of reference."

In treating the reading of K.5424c, he remarks again: "The names . . . are those of independent witnesses who were probably of Phœnician origin, and who thus preferred to be recorded in their vernacular character." Prof. Sayce says: "When one of the parties to the contract was of Aramaic descent, it was usual to add an explanatory docket in Aramaic to the deed of sale. Indeed this seems to have been sometimes done even when there were no Aramaeans in the case, so thoroughly had Aramaic become the language of trade." (*B. A. L.*, p. 126.)

In view of the fact that most of the tablets on which Aramaic is found are of a popular character, and circulated among a population in which were many Aramaeans—or people who were more likely

to understand Aramaic than cuneiform—it is very probable that we have here a concession to the prevalence of the Aramaic language in the marts of trade. We have cases where the contract in Aramaic on one side of the tablet is nearly as complete as the cuneiform on the other. Besides, there are “contracts” written entirely in Aramaic. This bilingual practice continued down to quite late times, since we have evidence of the existence of tablets in cuneiform and Greek.

The part played by the Aramaic scribe—whose existence is noted again and again in the “contracts”—in giving to us these readings, has not, so far as I am aware, been noticed. But it seems probable that their origin may be traced back to the desire of this official to see a word from his own language on the tablet which he had just prepared in the official cuneiform.

It is, of course, impossible to construct a grammar of this language from these fragmentary inscriptions; but there is sufficient evidence to show that we have here a dialect of Aramaic, rather than a few Assyrian or Babylonian words written in Aramaic script, though that does sometimes occur. The following tabulation of forms is submitted in this connection:

The singular emphatic of nouns is found in Nos. 2, 7, 10, 14, 16, 28, 36, 37, and 38.

The singular construct, in Nos. 2, 10, 25, 32, 34, 40, 42, and others.

The plural absolute in ן , in Nos. 6 and 25; in ן , in No. 35.

The plural emphatic occurs once, in No. 6.

The plural construct also once, in No. 18.

The Peal imperfect has two occurrences, viz., in Nos. 36 and 38.

Assimilation of ם to a following ך, and ן to a following ך, takes place in Nos. 2 and 7, respectively. (See D. A. G., § 52.)

The use of ך as a relative is seen in Nos. 2, 4, 6, 10, 16, 36, 37, and 38.

Its use as a sign of the genitive relation is seen in Nos. 7, 8, 18, 22, 34, 36, 37, 39, 43.

The following prepositions occur:

ב, "in," see No. 18.

ל, "to," in Nos. 36 and 38; ל, "concerning" in Nos. 16 and 20.

מן, "of," in No. 2.

על, "against," in Nos. 2, 6, 10, and 34.

על=קדם, in No. 37.

The numerical signs that are found in these inscriptions are:

I=1; II=2; III=3; II III=5; V=5; III III=6; IV=6;
I III III=7; II V=7; ך ך, ך ך=40.

The alphabet will be found to vary somewhat with the age of the tablet, and in some instances it seems to approximate to the "square" character. It is sometimes urged against the theory of the gradual canonization of the Hebrew scriptures, that Ezra brought the "square" character with him from Babylon. (See Ryle's "Canon of the Old Testa-

ment," p. 95 f.) This claim receives no support from the alphabet of these inscriptions.

After nearly all of these pages were in type, volumes II. and III. of Mr. Johns's "Assyrian Deeds and Documents" came into my hands. Unfortunately, they reached me too late to render the service they otherwise would have done. I desire, however, to express my indebtedness for a number of points which I have noted in the discussion of the Aramaic and elsewhere. Mr. Johns's latest volumes represent an immense amount of work, and bring us a long way toward the solution of the remaining "contract" problems. Volume II., besides containing a discussion of nearly every phase of "contract" literature, in three chapters entitled, "General Introduction," "The Officials," and "Metrology," supplies four hundred and twenty-four additional texts. Volume III. gives a summary of the contents of Nos. 1-321, of the first volume, and discusses in a very thorough manner the various formulæ that appear in the "contracts." The volume contains, among other things, a list of proper names and Assyrian and Aramaic words. Further contributions are promised. Those who work in this field in the future will find their tasks sensibly lightened by the abundant material Mr. Johns's volumes contain. The list of proper names and the treatment of this whole subject will prove especially helpful.

Many of the readings of A. D. D., which I have ventured to question, are read differently in volume III.; and the customary plan of shading broken parts of the tablet is adopted.

¹A case tablet.

²In the inner tablet, K.318a, the names of the third and fourth witnesses occur after the name, *Nabû-mušallim-šu-nu*, and the last name is omitted.

[are servants] of 𒀭udâ-a,
and Ninâ-a, the general of the king, has struck a bargain (for them).

For . . . mina of silver from 𒀭udâ-a
[he takes them; the price] is paid in full; tho[se
persons

Before Ištar-tariba, the . . . officer.

The month Ab, the 18th day,
the eponymy of Mušallim-Ašûr.

Before Marduk-zêr-ibni, the scribe.

ARAMAIC: The document concerning Illuhazzi

No. 16.

The sum of 10 shekels of silver
of the best quality of Ištar of Nineveh,
belonging to Bêl-lu-ba[laṭ],
received by Mannukî-Arba[ilu],
for the receipt(?) it shall be delivered.
The money shall increase to its fourth part.
On the 3rd day of Šebat he gives the money.

The month Šebat, 3rd day, the eponymy of Rammân-
rîmani.

Before 𒀭atpimuni.

Before Ra'-u.

Before Zêrukin.

Before Nêrgal-šar-ušur.

Before Ardi-Nabû, the Šelappian.

Before Mušêzib-Ašûr, (*ditto sign.*)

ARAMAIC: Concerning Manag-Arbel,
who shall bring to the temple (house)
the silver.

No. 17.

[The seal of Paḳa-ana-Arbaili,
the seal of Šār-Ištar, owner of the house sold];
the house . . .

with one door in it.

A boundary is the house of Šil-Nabû,
a boundary is the house of Tâb-šâr-Ištar,
a boundary is the house of Šamaš-êriba,
a boundary is the alley.

The house is at the entrance of Nineveh
and has struck a bargain (for it) Kukulâ.
From Paḳa-ana-Arbaili, from Šār-Ištar
for one-half mina of silver he takes (it);
the price is paid in full; that house
(that) is sold, taken.

Appeal, action at law,
complaint shall not be.

Whoever in the future, whenever
he shall rise up, enters a lawsuit,
either Paḳa-ana-Arbaili,

² Peiser would read, *Su-ka KI*, but H. W. B. gives two words for street,
that is, *su-ku* and *suḳaḳu*.

 apil-šu ša *m ilu* Rammân-uball-iṭ ina muḫ-ḫi *m* Iki-ša-aplu

¹This passage is against Peiser, who proposes "cash" for *pišu*, and "credited" for *ginnu*. Pinches translates *ginnu* by "standard," and Meissner, "species."

²A rubbed or erased sign, possibly, *kud*.

No. 33.

Two-thirds of a mina of silver of *ginnu*, belonging to Nidintum-Bêl, son of Bêl-rimanni, in possession of Marduk-rimanni, son of Bel-uballiṭ, son of the NI-ŠUR-ginê.⁴

In the month Šebat he pays the debt.

One-third of a (mina) $8\frac{1}{2}$ shekels of white silver, and 17 shekels of silver of *ginnu*

belonging to Nidintum, which was in possession of Marduk-rimanni,

is received.

Witnesses: Rammân-šar-ušur, son of Šamaš-(?)-a-a-bi.

Šamaš-uballiṭ, son of Bêl-kâšir, son of Sin-itti-a.

Nêrgal-šum-iddin, the scribe, son of Iki-ša-aplu,

son of NI-ŠUR-ginê. Sippara,

the month Tebeth, the 18th day, the 3rd year of Darius, king of Babylon

and countries.

ARAMAIC: Marduk.

No. 34.

Fifty shekels of white (?) silver in single-shekel pieces,

. . . not *ginnu* belonging to Marduk . . .

son of Rammân-uballiṭ, in possession of Ikiša-aplu,

³ Peiser translates, "coined;" C.I.S., "divided."

⁴ The *Ni-Sur-ginê*, was very probably a temple officer. (See B.A. III, p. 486.)

³ Over an erasure and illegible.

No. 36.

Six mina, 52 shekels of silver
of *ginnu* for the money, the price of . . .
belonging to the Aramaean, to
Šum-ukin it shall be given.

The month Elul, the 18th day, the 18(?)th year of
Darius, king of Babylon, king of lands.

ARAMAIC:

Concerning the silver which Bakats (?) gives
to Šum-ukin.

No. 37.

One bronze vessel of one-half talent weight,
belonging to Dumuk, son of Nabû-Bêlšunu, for
his rent for a month, 72 *ka* of grain to
Ki-Šamaš, son of Eteru, and Šamaš-iddin,
son of Ki-Šamaš, he will give. From the 6th day of
Tišri

the bronze vessel shall be in his possession. From
the 6th day of Tišri

[to the . . .] of the month Tišri, 36 *ka* grain is
due(?) From

[. . . Ni]san until the bronze pot of Dumuk
to the barbers the rent of the house . . .

into possession of the makers of the contract the
bronze pot shall be given.

Whatever month the rent of the bronze pot is given,
the obligation of the bronze pot, whoever shall
possess the bronze pot,

Ki-Šamaš and Šamaš-iddin shall bear.

inscribed on the obverse with cuneiform, and on the reverse with Aramaic. Rawlinson identified the ŠE-PAT-MEŠ of the cuneiform with the שערן, of the Aramaic, and translated, "rice." Brünnow suggests the more likely interpretation, שערן, "interest." In Sm. 957 the "30 *imêr* of ŠE-PAT-MEŠ" is referred to in line twelve as ŠE-BAR, which will bear interest if not paid when due. On this latter tablet occurs the same Aramaic word in the plural construct, that is, שערין. Although the use of the plural lends probability to Rawlinson's suggestion, it would be difficult in this case to say that the Aramaic word refers to ŠE-PAT rather than ŠE-BAR. It is unlikely that ŠE-PAT at the beginning is generic and ŠE-BAR, used later, specific.

The second word is, I think, זנה, only the first letter being rendered doubtful by a hole in the tablet. Line four contains an enumeration corresponding, I suppose, to the cuneiform. I read ב(?) after the number 5, which refers most likely to the 5 *imêr*. Then follows "3+3+1," and a rubbed sign, which looks like "40," although one expects to find here mention of the 30 *ḫa* of line six in the cuneiform.

A. D. D. III., 535, reads ב as an abbreviation for "time," and thinks that it belongs to the enumeration following, that is, "7 months." The sign I have interrogated is said to be נ, and to belong to the first word of the following line. This I think to be extremely unlikely, because there was no reason for separating נ from the word in the next line, to which it belonged; and secondly, because the sign, as I see it, cannot possibly be נ. It is true that in K.3785 נ accompanies the word for "harvesters," but it is not needed there.

C. I. S. reads the first word in the second line, the only one very doubtful, 𐤔𐤍, and translates: "Venditio Husiae Sig(abae) capitem septem Arad-I(star)." The last letter of this disputed word is probably 𐤁, but the two preceding are, I feel certain, the same as the first two in the enumeration 7, which follows. Doc. Jur. gives no value to the first and second signs in the first word of line two; the fifth sign, clearly 𐤁, he reads 𐤁. The sign of the genitive is not recognized. Dr. Peiser reads the disputed word. 𐤔𐤍, but suggests no translation. I read these signs as above, and translate, "and six others(?)," the 𐤁 being a contraction, perhaps, for 𐤎𐤓. The seventh letter in this line is peculiarly made, but on comparison with No. 18 and others I am satisfied it is 𐤔.

A. D. D., II., ¶ 42, seems to accept the proposal of C. I. S., 𐤔𐤍 as a contraction for "Sigaba," but this opinion is revised in Vol. III., 704.

No. 5.—83-1-18, 338.

𐤔𐤍𐤔𐤍𐤔𐤍𐤔𐤍𐤔𐤍𐤔𐤍

[𐤓]נת · 𐤎𐤓𐤔𐤍

THIS is the Aramaic rendering of the name in line three(?) of the cuneiform, only traces of which are left, but which is to be read in accordance with the Aramaic: "Mar-ḳi-ḥi-ta." In A. D. D., III., 729, Mr. Johns corrects his text, "Mar-ti-ḥi-ga," accordingly. The Aramaic script on this tablet was very

carefully and clearly written. Alongside of the last three letters of this proper name will be seen punctuation points, whose meaning, if they have any, I have not been able to discover.

No. 5 b.

· ר ·
· · · ר ר ר

NEITHER am I able to suggest anything definite for the fragments of two lines of Aramaic that appear on the end of this tablet.

No. 6.—Sm.957.

ר ש ר ר ר ר ר
ר ר ר ר ר ר ר

ר ש ר ר
ר
ר על נר ר

THE first and second words are inscribed on the end of the tablet. They occur around the hole left by

the stick which held the lump of clay while the tablet was being formed. The second line is written along the seal space, which accounts in part for the peculiarity of some of the letters.

A. D. D., III., 534, follows the order of C. I. S., which places the word **שעריא** first; but I found no space between these words, and am satisfied that **קשרן** comes first. I examined closely the three lines on the tablet immediately before **ק**, as seen in C. I. S., *Pars Secunda, Tomus I., Tabulae No. 42 a et b*, and decided that no letter was intended there. In the reference just given, No. 42 c will show why **נ** appear under **שער**: the word was written on the narrow shoulder of the tablet between **קשרן** and a line of Assyrian. I would translate: "The bond of interest which is upon Nabuduri."

No. 7.—K.281.

דנת אמתא חבש . . . זי לקח . . .
 ח
 ח (?) מ (?) ס (?) ת (?) זי

THIS inscription is very difficult to decipher, as most of the proper names are wanting in the cuneiform, and the Aramaic itself was carelessly scratched on the hard tablet.

The first line I regard as quite certain. Possibly 𐤁 is to be supplied in the break after the third and last words. The 𐤃 supplied by Peiser to complete the third word is, I think, not possible.

Line two is read by C. I. S., **בסחור**, but no meaning is discovered. Rawlinson reads **𐤁** here; Peiser, with many question marks, reads, I. and VIII., that is: "1 mina, 8 shekels." A. D. D., Vol. III., 708, reads: III. V. **במני**. But I can only see a possible 𐤃 with two doubtful lines before it.

Line three is read by C. I. S., **חרא . . . והזיוס**, and the last word is identified with "Hazi." Dr. Peiser reads, **[א]חז ימנתא אחז אישו**, which he translates: "Vor(?) Jamanta vor(?) Asu." Rawlinson reads, **חזג . . . חפסם**, without venturing any interpretation except for the last word, which he says may be identified with "Hazi" . . . Doc. Jur. seems to have followed Rawlinson's reading, but to have been careless about copying, since in line three the first letter, while omitted from the original, is produced in the transcription.

What I have copied can be seen above. I think, however, that the second and third lines are too badly preserved to yield now any definite results.

In the Aramaic reproduction of the Assyrian name, "Hambusu," the *m* is evidently assimilated to the following *b*. (Compare No. 2, where "Handuate" appears in the Aramaic with *n* assimilated to *d*. The softened guttural of "Luku" appears as 𐤃 in the Aramaic reading.)

No. 8.—80-7-19, 52.

Ⲁⲓⲛⲁⲓ ⲛⲁⲓ ⲛⲁⲓ

ⲛⲁⲓ ⲛⲁⲓ ⲛⲁⲓ

ALMOST the entire obverse of this tablet, which referred to the rent or sale of land, is gone. The names of the principals in the case, as well as the terms of the contract, are lost, and it is impossible to find means of comparison for the Aramaic, which is also broken at both beginning and end. The letters that remain are very distinctly cut, and I have reproduced them as accurately as possible. The second letter is ⲛ, I think, though often the only difference between this and ⲛ is the length of the stem; and when both are not present, and no other means of comparison at hand, it is difficult to decide. The sign of the genitive is certain. I am not sure about the next two letters, the first is ⲛ or ⲛ and the second, ⲛ, I think.

No. 9.—83-1-18, 329.

ⲛⲁⲓ ⲛⲁⲓ ⲛⲁⲓ ⲛⲁⲓ

ⲛⲁⲓ

ⲛⲁⲓ

THIS tablet probably recorded the sale of a slave belonging to Sapiku. Unfortunately the names of the

slave and the purchaser have disappeared, though the name of the latter may be preserved in the second line of the Aramaic. The sixth letter in this line C. I. S. reads 𐤒, and gets the equivalent of "Nabû-šar-iddin." I think the letter is 𐤓, without much doubt, and I agree with Peiser's reading, which gives us the equivalent of "Nabû-šum-iddin. Peiser questions the fourth, fifth, and sixth letters also.

No. 10.—82-5-22, 176 b.—Case.

𐤠 𐤒 𐤓 𐤔 𐤕 𐤖 𐤗 𐤘
𐤙 𐤚 𐤛 𐤜 𐤝

אגרת כספא
זי על זבן

The Aramaic here is very clear. For אגרת, cf. the Hebrew and Aramaic, אגרת and אגרא, respectively. It corresponds to the Assyrian *egirtu*. The word is a synonym of *dannitu* and *duppu*. And to the examples cited by H. W. B., p. 225 b, should be added *ša-bit egirtu*.

No. 11.—K.320.

𐤠 𐤡 𐤢 𐤣 𐤤 𐤥 𐤦 𐤧 𐤨 𐤩 𐤪 𐤫 𐤬 𐤭 𐤮 𐤯 𐤰 𐤱 𐤲 𐤳 𐤴 𐤵 𐤶 𐤷 𐤸 𐤹 𐤺 𐤻 𐤼 𐤽 𐤾 𐤿

אשת עבד(?)רנבו

RAWLINSON reads this, 'שחת עבדנבו, "attestation of Abed-Nebo." He remarks that the only doubtful letter is the first.

C. I. S. reads, אִשְׁתַּ עֲרַדְנֹו, "Mulier Arad-Nebo." The second and sixth letters in the second word are alike, and, I think, are ג.

Doc. Jur. reads, קִנְתָּ שְׁלִי [ת]כְּנָנְנָא, that is, I suppose, "sale of Siltiba-Nana." This is an attempt to connect the reading with the proper name mentioned in line six of the cuneiform.

Mr. Johns ingeniously conjectures that the broken wedges before *it-ti-din*, line twelve, should be read, *assutsu-šu*, "his wife," and that the slave here purchased was presented to the "Ardi-Nabû" of line twenty-eight. So we should read the Aramaic: "Wife of Ardi-Nebo." This would suit the first word in my copy, which can well be rendered "wife." The second word, however, must probably be read, "Abed-Nabû," which would still be a very good equivalent for the Assyrian word, "Ardi-Nabû." The third letter in the second word is very doubtful. I am uncertain whether the scribe intended ן or meant to erase a letter, or used a worn stylus that left several meaningless marks.

No. 12.—K.329.

אִשְׁתַּ עֲרַדְנֹו ; אֲבֵדְנֹו

דַּנְתָּ . . . שְׂרַדְרַקְאֵל

FAINT traces of two letters, possibly א and ש, appear at the beginning of the second word. This contracted form for the name Ištar would be regular

enough. (Compare No. 17, **סראש**, for "Šar-Ištar.") The legend would then read: "The document concerning Ištar-dur-kâl."

Rawlinson read the second word **עשדרקל**, "Asha-(Istar)-dur-kali," missing, somehow, the third letter, **ר**, and the last but one, **ס**. It is worthy of note here that, while the long vowel in *kâl* is recognized in the Aramaic, (probably because it was spelled out in the cuneiform), in the syllable *dûr*, which was written ideographically, it is not indicated.

Eduard Stucken, in "Astralmythen der Hebraer," etc., translates the phrase: "Ištar-bad-ka-a-li." The cuneiform sign rendered *dûr* in this word has also the value, *bad*. This, I suppose, led Stucken astray.

No. 13.—K.421.

אֵלֶּפְּיָאֵלֶּיָא

דַּנְתָּ חֻקְלָא

THIS tablet describes the rental of a piece of land styled: *atru*, *kirû*, *tapriu*, *bûru*; which means, Mr. Johns thinks, "a court and cultivated(?) garden, with a well." The Aramaic, which reads, "The document concerning a piece of land," is very plain, and, although the tablet is rubbed after the last word, I doubt if anything is lost. **ס** 3, of the Assyrian word, *eklu*, is represented in the Aramaic regularly by **ח**.

No. 14.—K.309 a.

 רנת · ארבלסר

WE have here a contraction of the name “Arba-ilu-šar-rat” into “Arbel-sar.” (Compare Nos. 12 and 17.)

Rawlinson read the fifth letter in the second word 𐤀, in order to identify it with the Assyrian name which he at that time read, “Arbail-ḫirat.”

In regard to the abbreviated form of this word, Oppert remarks on the loss of final 𐤀 in the pronunciation in the “Phœnician” of these tablets as follows: “Cela prouve que le *T* féminin commençait à n’être plus prononcé comme le 𐤀 en hébreu.” (Doc. Jur., p. 204.)

No. 15.—K.331.

 רנת אללה[?]

THE beginning of the proper name is lost in the cuneiform, which has *-az-zi*, while the last letter, probably 𐤀, is partly broken off in the Aramaic. C. I. S. translates, “Ilu-lu-hazzi,” and hesitates between 𐤆 and 𐤀 for the final letter. Berger reads 𐤆. I found the traces of a possible 𐤆. The proper name here represented I have not met with elsewhere.

At that time he identified the Aramaic with the two proper names mentioned above, and, although he was unable to read the last, surmised that the first sign had the value of *sar*, and the last was the name of the great goddess. The cuneiform proper names are read correctly in Doc. Jur.

The proper reading and equation of the Aramaic was first recognized, I believe, in C. I. S.

Rawlinson points out, in connection with this tablet and K.405, that when the name in the Aramaic appears without any prefix it must be taken as the name of the vendor.

No. 18. 80-7-19, 348+83-1-18, 387+
83-1-18, 350.

TABLET 83-1-18, 350 is the lower right half of a tablet which was broken in four pieces, 80-7-19, 348 and 83-1-18, 387 forming upper left and right respectively. Although these parts do not "join," they clearly belong together, and their relation to each other was first recognized, I think, by Mr. Johns, A. D. D., No. 429. The lower left is still missing, unless Mr. Johns has been fortunate enough to secure it recently. Considerable space is lost between

80-7-19, 348 and 83-1-18, 387 not indicated clearly in A. D. D., and in this break has perished, I think, the name of the second owner, for there were evidently two.

The tablet records the sale of land with a park of *belit* trees and a house, together with some eight persons attached to the soil. The Aramaic inscription is written on the right edge of the tablet, the 𐤁 of the second line appearing on 83-1-18, 387. The break and the rubbed portions here are over an inch in length, so that there is room between 𐤁 and 𐤆 of the second line for four or five letters, and likewise before 𐤎 of the first line.

This first letter, 𐤎, is doubtful, as the tablet is broken along the edge of the letter. It looks to me most like 𐤎, though 𐤎 is possible. Probably the word for "house" was here.

The next word I regard as certain, though 𐤍 is badly rubbed. The word "Haphned" I have not been able to identify with any proper name in the cuneiform, but take it to be the name of the district where the aforementioned land was situated. The first words in the second line probably contained the name of one or both of the owners.

For the last word C. I. S. proposes, "In the district of Babsukin," comparing 𐤍𐤕 with the Assyrian *mātu*. I have not been able to identify this place. Line six (Ob.) of 83-1-18, 350 seems to locate the land on a road leading to a place whose name ends in *hili*. The whole inscription may be tentatively rendered: "[The document concerning persons, house,] and fields of Haphned, belonging to N . . . d, in the district of Babšakin."

No. 19.—83-1-18, 334.

שרכון ט

C. I. S. IDENTIFIED this name with that of "Sargon." This is quite possible since, although the Hebrew spelling is סרגון, the Aramaic is often nothing more than a transcription of the Assyrian name. This suggestion, however, leaves unexplained the ט following. Lidzbarski proposes to identify it with "Sitirkanu," the name of the third party sold, while ט stands as the initial letter of "Ṭabuni," mentioned in line three. The absence of *t* from the Aramaic in the first word is no objection. (Cf. Nos. 12 and 17). But the reading "Sitirkanu" is not absolutely certain, as the horizontal wedges are partly broken off of the first sign, and the sign as it now stands might equally well be *gur*. There was no doubt room on that part of the tablet broken off for the third name, "Barahu," but I can think of no reason for the unusual reversal of the order of names. (See Nos. 4, 5, and 17.) It is worthy of note here that only part of the purchaser's name appears, "Marduk . . .," and that this purchaser bore some relation to Sennacherib.⁴

about which I feel any certainty. In C. I. S. Berger and Clermont-Ganneau are said to have proposed בן . This would probably correspond to the fifth, sixth, and seventh letters. Vogüé was satisfied that he found the word בנעיר , that is, "Bin-na'id," but this seems to be an attempt to bring it into correspondence with the name of the purchaser, Rammân-nâ'id, which is read "Bin-na'id" in C. I. S. Pinches is said to have read "Addu-Na'id." Rawlinson reads the last four letters רנאר . . . Possibly the first two letters are the relative pronoun, and the third the preposition ב , "in," while the rest of the word is the name of the district in which the land was situated.

No. 24.—K.458.

$\text{בן אר$
 . . . $\text{נא} \dots \text{ל}$

THIS tablet is a small fragment with but five perfect lines. Imšai is the purchaser, and perhaps . . . *Zerutu*, traces of whose name appear in line three, was the vendor. Only three letters of the Aramaic remain, and from them I have not been able to make out anything definite. Possibly there was here a proper name, preceded by the preposition ב .

No. 25.—K.3784.

··· מְלִיכָא · בַר (2) ··· שַׁעֲרָן (1)
 ··· ח (4) ··· וַע (3)

FOR a discussion see the similar inscription, No. 2. For the original Aramaic, which it was not deemed necessary to reproduce here, see No. 25 of the texts. Line two may have contained the name "Yaisu," and line three, following ··· לְוַע, the name "Gabbu-ilâni." The ח at the beginning of four is either the first letter of "Ḥanduate" or of the word for "harvesters."

No. 26.—81-2-4, 395.

 [לְ] אֲשֶׁר־תֵּב

THIS fragment of a tablet contains eleven lines, only one of which is perfect. The purchaser's name was possibly . . . Nâdi]n-ahê. (See line five of the cuneiform.) This is the only name that appears on the tablet. The letter לְ, which I have ventured to restore, may have been lost from the beginning of the word. C. I. S. proposes "Asur-tâb" as the equivalent of the Aramaic. The ט of the cuneiform is usually represented by ט in Aramaic, though sometimes by ד. (See Nos. 2, 9, 17.)

No. 29.—76-10-16, 17.

פננטם

WE have here, in abbreviated form, the reproduction of the cuneiform name, "Pani-Nabû-têmu."

No. 30.—82-9-18, 50 a.

אבת

THE Aramaic represents the Babylonian word, *abattum*. This word is discussed in the Introduction. Very probably it is only a transcription of a Babylonian word, as it is doubtful if any such word exists in Aramaic. I have shown in the Introduction that this cannot be a proper name, as read by Pinches in C. I. S.

No. 31.—82-7-14, 725.

מרסגלמר

THE Babylonian text contains the name of "Mar-Esaggil-lumur(?)," keeper of the birds of Šamaš.

Unfortunately, the sign is badly broken, and, still more unfortunately, the letter corresponding in the Aramaic has been erased and rewritten; so that it is impossible to say with certainty what was intended. As the letter now appears on the tablet it might be read מ, ן, or perhaps נ. On the whole, it is probably most like the undoubted ן in No. 32. This would suit admirably if we were sure that the cuneiform sign was *mur*, as, in that case, this tablet, with Nos. 32, 36, and 37, would go to prove that the Babylonians pronounced *m* as *w*.

No. 32.—79-4-19, 3.

THE first word answers to the Babylonian *amelutu*, in which *m* corresponds to *w* of the Aramaic. This interesting fact is illustrated also in the Hebrew treatment of the same word. (Cf. 2 Kings 25: 27:

איל מרדך.)

The first letter in the second word looks like the left half of ק. Whether this is all the scribe wrote or whether the rest has been rubbed off, I am unable to say. The cuneiform sign calls for מ, but the scribes were not always careful in distinguishing between these two letters. (Cf. No. 1, where מ of the Aramaic corresponds to ק in the cuneiform.)

Since this word ends in ' , C. I. S. argues that it must have been pronounced "Kunnai," and that this proves that the *a-a* of the cuneiform word, "Ku-un-na-a-a," should be pronounced *ai*. The last part of the name in the cuneiform is badly broken, and it is not, now at least, at all certain how the word ended. Besides, the Aramaic of these inscriptions is too abbreviated, and altogether too uncertain a quantity by which to settle disputed points in Assyrian grammar. The following reproduction of cuneiform names may be suggestive in this connection: No. 34, cuneiform, "Iḫi-ša-aplu;" Aramaic, אִקְשִׁי. No. 38, cuneiform, "Eriba-a;" Aramaic, רִיבִי.

In line two ט stands for "shekels," and the enumeration 47 is reached by writing two twenties, two threes, and a one. The twenties are each two tens. It seems, therefore, from this and other enumerations, that the Assyrians and Babylonians made use of the decimal system alongside of the sexagesimal. It will be noticed that the Aramaic of this inscription is written in a cursive hand.

No. 33.—82-9-18, 335.

𐤏𐤍𐤏𐤍

מרדך

THIS reading contains simply the word, "Marduk," the name of the debtor, who appears in the cuneiform text as "Marduk-rimanni."

No. 34.—89-10-14, 257.

ש[ט]ר זי ש 40+
 על אקשי

THE contract relates that fifty shekels of silver were received by Iḳīša-aplu.

The second letter of the first word is entirely gone, but we can restore it without hesitation. In the enumeration after the letter ש only four straight strokes are left, the fifth having been broken off. Unlike the curved lines which represent "10" in No. 32, these, it will be noticed, are straight.

The name "Iḳīša-aplu" is represented like the name in No. 33, without the last constituent part. It is true that the form אקשי does not very accurately reproduce this name, but we are, I think, justified in supposing that the difference is due to the difference in the pronunciation of those who used Aramaic. Certainly it would not be safe, in view of the well-known tendency toward abbreviation which these Aramaic readings show, to argue from the word "Akšai,"—if that is the pronunciation of the Aramaic word—to a proper name: Iḳi-ša-a or Iḳi-šai. The ק of this word is written very clearly, yet differently from any other I have noticed.

No. 35.—82-9-18, 4034.

אסנין

THIS little tablet records the product of a certain piece of land as *6 ka of as-ni-e*, "produce." The Aramaic, which is written in a cursive script very much like No. 32, gives us the same word and in the plural also.

No. 36.—82-9-18, 310 a.

זי כספא זי יהב בקצ
לשוכן

IN the cuneiform of this tablet the name of the debtor, which appears from the Aramaic to be "Bakats," is not given. He is called, however, the Aramean. Examples of ק and ז similar to those of this inscription may be seen in "Die Phönizische Sprache," by Schröder, p. 76, Taf. B. The א is decidedly different from those of the earlier tablets, but very similar to those in the next following number, which is also from the reign of Darius. In this short inscription the particle זי is used both as a sign of the genitive and the relative pronoun. The *m* of "Šum-ukin" is again represented by נ, as in Nos. 32 and 37.

No. 37.—82-9-18, 49 a.

כרמא זי קרם
 דזשוא את ביתא
 " " " " " " " "

כרמא זי קרם
 דזשוא את ביתא
 6 . . . (?) א 40

THE first and second letters are somewhat uncertain. ע does not look unlike ב, and ר resembles ו. It would be possible to read כרמא were it not for the third letter, which is unmistakably ב. Instead of the usual על before the name of the debtor, this inscription uses קרם.

The "Ki-Šamaš" of the cuneiform is here written "Ki-Šawaš." This name is probably contracted from "Mannu-ki-Šamaš."

The second word in line two, את, C. I. S. identifies with *idu*, "rent." As it is followed by the word for "house," this seems probable enough. The choice of ת in this word may have been determined by the Babylonian pronunciation of the aspirate ד.

The enumeration of the last line, which seems to contain several arbitrary signs, I have not been able to make out.

No. 38. 82-9-18, 51a.

וּגְזַלְתָּ לִּי וְ-וְגַחַל
 אִיִּי גַבְעַג

זִי כַסְפָּא זִי יְהַב
 לִי(?) אִרִּיבִי

THIS tablet records a debt of silver due Eriba as the price of sesame. The Aramaic, which resembles closely that of No. 36, says: "Concerning the silver which one gives to Iribi." Between ל and י, in the last word, is a stroke which might be ז, but I doubt that it was so intended. The disputed proper name, "Eriba," sometimes "Erba," is here written "Su-A" in the cuneiform text. If we are to trust the Aramaic, the verb in this word is to be read in the imperfect, rather than in the imperative. (See H. W. B., p. 310a; also B. E. P., Vol. I., p. 58: "Erba-a or Eriba-a [Aramaic docket: אִרִּיבִי]").

No. 39.—82-9-18, 295 A.

וּגְזַלְתָּ לִּי וְ-וְגַחַל

זִי אִישְׁפַּר

THE contract concerns money and supplies to be given to the weaver, UŠ-BAR. Tallqvist, in Spr.

Ndb., read this word, *Ušparu*, and compared the Aramaic, אִשְׁפָּרָא, "clothes-cleaner." Peiser, in K. B., Vol. IV., retains the ideographic writing. Prof. Delitzsch, in H. W. B., p. 147a, says concerning this ideogram: "Höchst warsch. nur *išparu*, nicht *ušparu* zu lesen." The Aramaic word in this inscription may be taken, I think, as finally settling the pronunciation of the word in favor of Prof. Delitzsch's supposition. The א and פ in this word approximate to the "square" character.

No. 40.—82-7-14, 152.

שטר זבס

שטר זבס

THE obverse of this tablet is almost wholly gone; the reverse contains the name of several witnesses. On the edge is a nail-mark, before and after which are the words, *šupur* and "^mZa-bi-ši," respectively. The Aramaic, which is slightly damaged along the top of the letters, reads: "The writing concerning *Zabas*." The word שטר very probably meant "contract," and corresponded to the Assyrian *šitru*, though I am not aware that the latter word was used in this technical sense. Compare, however, *šaṭâri maškânu*, Spr. Nbd., p. 133. The top of the last letter is broken away, but it was very probably a א.

No. 41.—K. 5424 c.

שחח בימחו זה
 שחח מת מת זה

שחח בימחו זה
 שחח מת מת זה

THE upper part of the tablet is entirely gone; the remainder of the obverse is very illegible, but seems to contain an enumeration of grain. The reverse has the name of five or six witnesses well preserved. The Aramaic was scratched on the hard surface of the tablet, and hence only faint lines can be seen. The first and last words in each line are tolerably certain, but I am not at all sure of the middle words. Rawlinson thinks we have here the names of additional witnesses, and translates: "This is the attestation of so and so." The last word, *זת*, he regards as the feminine of the demonstrative pronoun corresponding to the Hebrew *זאת*.

No. 42.—K.3783.

THIS fragmentary text has already been discussed in the translation.

No. 43.—82-3-23, 1142.

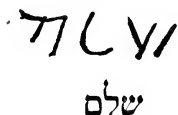

שטר זי דרח

THIS tablet, which is inscribed with cuneiform only on the obverse, is very badly crumbled. The first line is almost wholly gone, while the remaining signs are very uncertain. It seems to contain a record of money due a temple. The Aramaic seems to say, "The contract of Darah," but I have been unable to find any proper name with which to compare this last word. The Aramaic is written obliquely across the reverse in coarse, and somewhat irregular, letters. The document is not dated.

No. 44.—81-7-11, 1515.

THE tablet on which these letters occur is a small fragment about an inch square. The obverse has the remains of two signs; the reverse, parts of three proper names. The Aramaic is on the edge, and is broken away at both beginning and end. The letters are very clearly inscribed, but in the imperfect state of the tablet it is impossible to say what they mean.

No. 45.—80-11-12, 1290,

THIS fragment is about two inches long and one inch wide. The obverse contains the remains of four lines, and the reverse contains, besides the traces of some few signs, the name of "Bêl-ahê-su" and the date, "Babylon, in the time of Artaxerxes" (?)

The tablet is broken off close to the first letter of the Aramaic, so that I am unable to say whether the word began with ש or not. The last letter might also be read ה, though I think מ is much more probable. This might be the word "peace," or contain part of such a proper name as "Šalammanu," (cf. No. 29) or "Nabû-šallim" (cf. No. 47).

No. 46.—82-3-23, 268.

THIS little tablet of three lines is inscribed only on the obverse, and seems to contain memoranda of some sort. The tablet is incomplete, as the space for the fourth line seems to have been left vacant. The Aramaic is roughly written with a poor stylus, as shown by several lines alongside of the last letter.

The only doubtful letter is the third, which is either 𐤁 or 𐤅. I have decided in favor of the former, though the letter resembles very much the first one in No. 37. I am not able to suggest any satisfactory meaning, unless we have here a variant spelling of *išparu*. (Cf. No. 39; see also H. W. B., p. 147a: *ša iš-bar-ti*.) If this supposition is correct, the *kab kat* of lines one and three of the cuneiform may be some sort of cloth.

No. 47.—K.3788.

𐤁𐤀 𐤅𐤏𐤗𐤁𐤅𐤅
 [נבושלם אק]רא

THE tablet on which this reading is found is a fragment, probably from the time of Esarhaddon—at least the greater part of the king's name appears in line two of the obverse. This, with other similar tablets, is treated by Dr. J. A. Knudtson in G. A. S. I have given it at the end of my collection for the sake of completeness. The first word is clearly the name "Nabû-šallim" transcribed into Aramaic. Knudtson suggests the completion of the second name as above, and compares the proper name, "A-qur-a-a."

REGISTER OF PROPER NAMES.

—

The figures refer to the transliterated and to the cuneiform texts. Feminine names are indicated by the letter "f."

¹ Written *IM*. The Tel-El-Amarna tablets vouch for *Adad*, which was no doubt the name of this god of the West. *Adad* was certainly known in Assyria, but I think we are not yet justified in discarding the name *Rammân*.

The text on the obverse of the tablet is arranged in a roughly triangular shape, with lines of cuneiform script. The lines are numbered on the left side as 6, 9, 12, and 15. The script is dense and characteristic of the Assyrian cuneiform alphabet.

Ob 

Obverse of a cuneiform tablet, labeled 'Ob'. The text is arranged in four lines. The first line contains two columns of characters. The second line also has two columns. The third line has two columns. The fourth line features a large, stylized symbol that appears to be a combination of a vertical bar and a curve, possibly representing a specific word or a section marker.

No. 47.—K.3788.

Ob.

Obverse of a cuneiform tablet, labeled 'Ob.'. The text is arranged in several lines, with some lines starting with a '6' and others with 'Re'. The script is dense and includes various symbols and characters. At the bottom, there is a large, stylized symbol that looks like a combination of a vertical bar and a curve, similar to the one in No. 46.
